RSK/P-Flap Valve

PRODUCT DESCRIPTION
Floater-supported RSK/P-Flap Valves reliably protect against backwater and flooding. Using adjustable weighted lever mechanics in combination with a floater, opening and closing times can be precisely set. The flap gates are available in nominal widths DN 250 to DN 2500 in both rectangular and circular formats.

YOUR ADVANTAGES
- Safe opening and closing
- Level control using floaters
- Round and rectangular versions
- Large nominal widths series

USE
- Sewage systems
- Outlets/overflows
- Storm water tank
- Separating structures
