

# SBR-Unit/System

SMART Machine/System/Plant

## USE

- Municipal waste water treatment
- Industrial treatment plants

## PRODUCT DESCRIPTION

SBR-Units/systems from HST are graduated, standardised turnkey solutions consisting of the significant process components for SBR System technology. You can obtain the equipment which is networked using automation technology and IT from us. Everything is of course equipped with the most modern process automation and operating control technology developed in-house.

## YOUR ADVANTAGES

- Dynamic cycle control/highly efficient operating modes
- Compact, rational and quick construction
- Operationally ready solutions from one provider
- Quality and safety through standardisation and preproduction
- Low surface consumption
- SMART Plant
